Forecast for Wednesday 06 Sep 2023

Weather: Patchy dense fog in valleys first thing, this clearing by mid-morning, then dry and mostly sunny but some high cloud at times. A small chance of a few isolated showers later in the evening, most likely after dark, and an outside chance of a thunderstorm.

Chance of cloud-free hill tops above 600m: 80% becoming 95% or more.

Low cloud and visibility: Patchy fog in valleys first thing will give some locally very poor visibility until mid-morning. Thereafter generally good visibilities though once again fairly hazy.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling hotter than on Tuesday due to much lighter winds. High levels of UV are likely through the midday hours, so sun protection and adequate hydration is vital.

Recent rainfall: measured at Neuadd: altitude 353m
